

3rd Year Arch. Final Exam 2021  
ع.ع.ع

**DESIGN OF STEEL STRUCTURES**

**OPEN BOOK EXAM**

100 % = 70 Marks

Page 1/1

- Material of construction is Steel 37.

- Any missing data may be reasonably assumed.

**Question (1): (65 %)**

*Handwritten signature and scribbles*

**a-** Design a tension member two angles back to back to carry a total force equal to 8 ton and its length 3.6 m. (15 %)

**b-** Check the safety of the compression member one angle 100 x 10 with length 1.8 m to carry a design force 6.0 ton. (25 %)

**c-** Design a simple beam with length 3 m, and  $(M_x) = 5 \text{ m.t}$ , use IPE section. (25 %)

**Question (2): (40 %)**

An industrial building is to be constructed over an area shown in Fig. (1) with clear height equal 8.0 m. columns must be on the parameter only. Choose a suitable steel system, and Draw the layout {elevation, plan and side view} of the steel Show all necessary elements and bracing

**Fig. (1)**
